FOMEX M Studio flash

M 200/400

FOMEX M

studio flash

Whoever you are professionals or amateurs, Fomex M studio flash perfectly creating the amazing photos is always highly recommended. The most lightweight and compact strobe in Fomex provides the best surroundings for photo shootings.

The compact Fomex M studio flash offers the best solution for not only products shooting but also portrait photography. Thanks to the compact size and lightweight feature, this strobe can be used in very narrow space which helps to increase its convenience.

Regardless of the brightness control, it maintains the stable and soft light and is designed to previously estimate the range of the light by LED modeling lamp. Furthermore, Fomex M studio flash compatible with a variety of light shapers from other companies helps to perfectly express the light with its superior performance.
