

Operating Instructions for Softbox

SOFTBOX

Dear Valued Customer

Thank you for choosing softbox.
Softbox has been designed to be accurate, ergonomic and simple to use. Working closely with photographers to develop softboxes that meet the standard demands in today's professional studios. In order to obtain the full benefit from you purchase, please take a few minutes to familiarize yourself with this user manual.

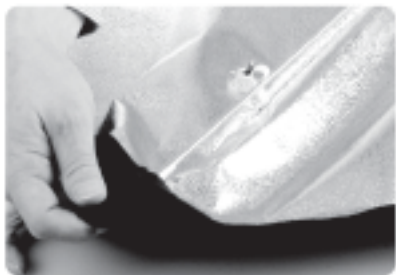

Thank you

1

Insert the rod through the rubber loop in the middle of the softbox line.

2

Lead the rod through the middle and push to the Velcro at the each corner of the softbox

3

After all the rods are installed, push the rod ends into the adapter ring.

4

This is how it should look after all rods are inserted.

5

Hold each side and pull them close together so you will be able to close the zipper.

6

Line up the zipper and zip it completely

7

Once your softbox is assembled, connect it to your flash-head, ensuring that it is securely attached.

8

The inner diffuser is to be put on with clips inside the softbox.

9

Attach the outer diffuser into the Velcro of softbox.

Warning

When taking softbox apart, please be sure to hold both sides of the softbox as you release and open the zipper. The rods are under a lot of tension.
